**COVID-19 Daily Situation Report  
02/08/2020  
Turkey**

**03/08/2020**

### Summary of 02/08/2020

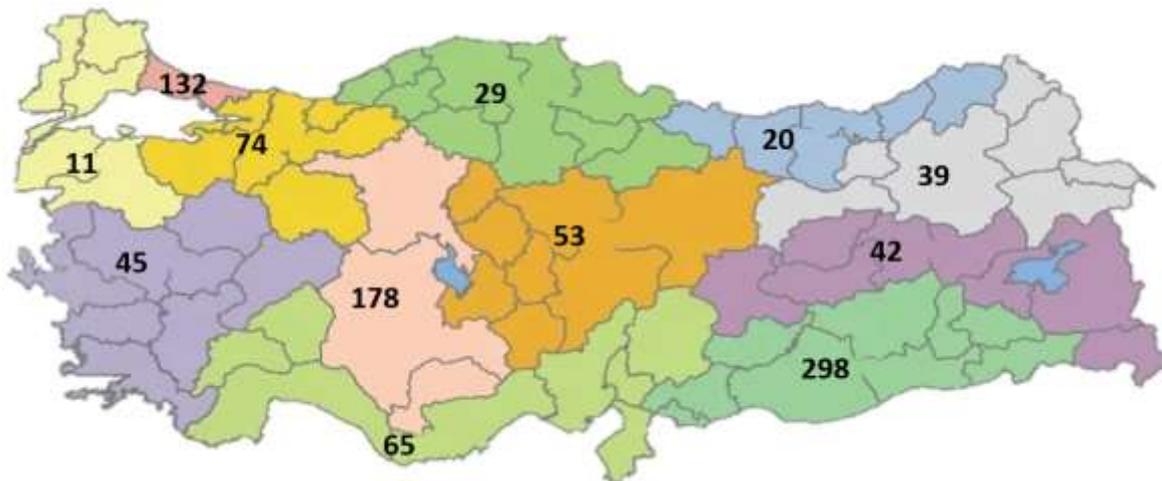

- Compared to the previous day, the number of new COVID-19 patients decreased (-1,1%).
- Considering the percentage of changes in the patients by NUTS-1, the highest decrease was in the Eastern Blacksea Region (-41,2%), the highest increase was in the Eastern Marmara compared to the previous day. When analyzed in terms of the number of patients, this difference was only 10 patients.
- The number of new COVID-19 patients per 1.000.000 population was 15,3 for women and 17,7 for men among the 65-79 age group.
- Western Blacksea Region has the highest decrease in the number of new hospitalizations (-37,5%). On the other hand, the Western Marmara Region has the highest increase in the number of new hospital discharges compared to the previous day (20,0%).

**Table 1:** Summary Table of COVID-19, Turkey

| Indicator                         | 02/08/2020 | Difference Between Previous Day | Change from Previous Day, (%) |
|-----------------------------------|------------|---------------------------------|-------------------------------|
| Number of Tests                   | 40.196     | -4.837                          | -10,7                         |
| Number of New Patients            | 986        | -11                             | -1,1                          |
| Number of New Hospitalizations    | 512        | 29                              | 6,0                           |
| Number of New Intubated Patients  | 45         | 12                              | 36,4                          |
| Number of New Hospital Discharges | 437        | -31                             | -6,6                          |

**Table 2:** Number of New COVID-19 Patients and Change from Previous Day by NUTS-1, Turkey

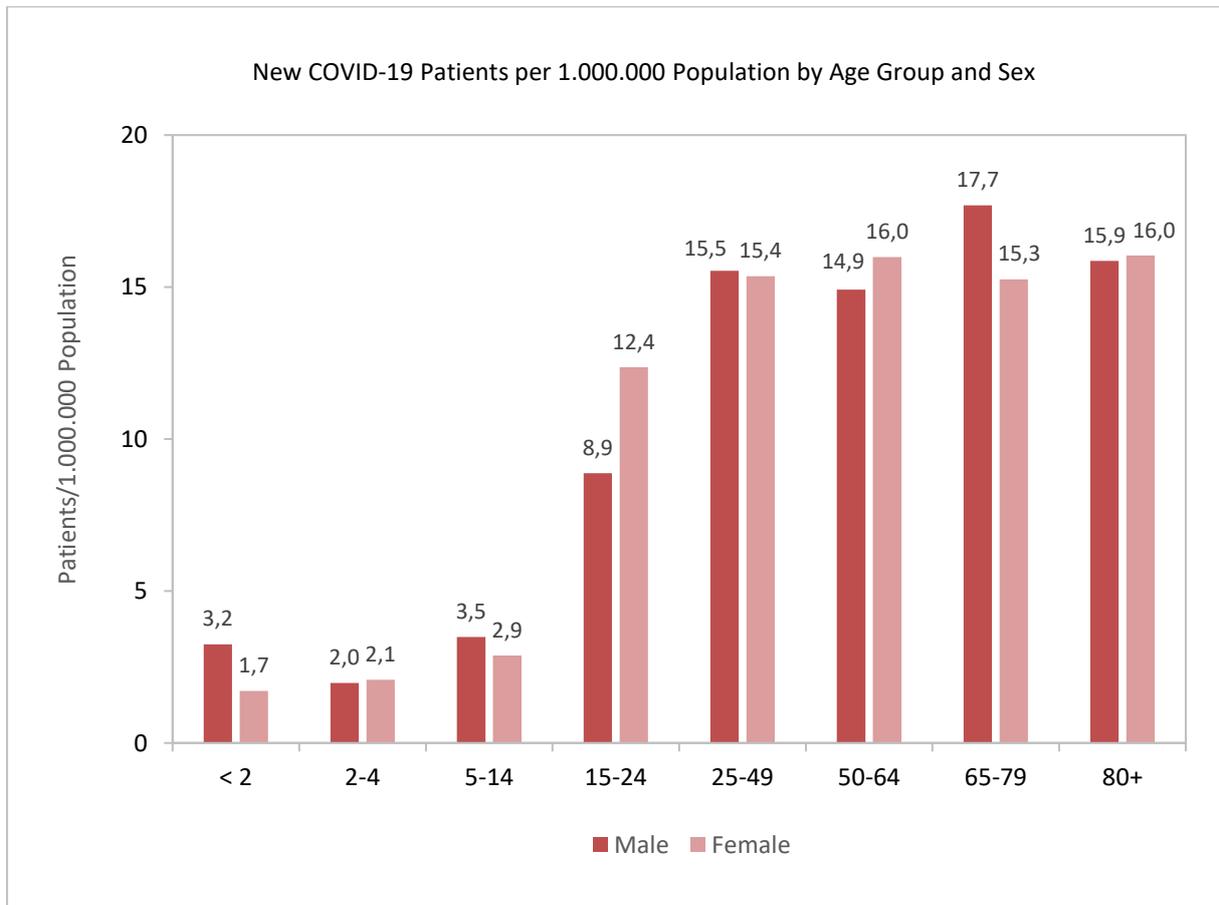

| NUTS-1                | Number of New Patients | Difference Between Previous Day | Change from Previous Day, (%) |
|-----------------------|------------------------|---------------------------------|-------------------------------|
| Istanbul              | 132                    | -21                             | -13,7                         |
| Western Marmara       | 11                     | -4                              | -26,7                         |
| Aegean                | 45                     | -12                             | -21,1                         |
| Eastern Marmara       | 74                     | 10                              | 15,6                          |
| Western Anatolia      | 178                    | 21                              | 13,4                          |
| Mediterranean         | 65                     | 5                               | 8,3                           |
| Central Anatolia      | 53                     | -16                             | -23,2                         |
| Western Blacksea      | 29                     | -7                              | -19,4                         |
| Eastern Blacksea      | 20                     | -14                             | -41,2                         |
| Northeastern Anatolia | 39                     | 3                               | 8,3                           |

**Notes:**

- All COVID-19 patients are laboratory confirmed.
- Data in the Daily Situation Report includes the period between 00:00 and 23:59.
- As of the first COVID-19 patients in Turkey were notified on 11 March 2020, patients more than once hospitalized, intubated and discharged from hospital are included only once in the calculation of indicators.
- Percentage change is an indicator that represents the degree of change over the previous day. The calculation is as follows:

$$\text{Percent change} = \frac{(\text{New value} - \text{Old value})}{\text{Old value}} * 100$$
